

## FRANCE IS INCLINED TO RAP PRESIDENT

Several Writers Put Most of Blame on Wilson's Shoulders—Statement Not Good Policy.

## STILL TALK OF ALLIANCES

One Writer Says Too Much Is Sacrificed to Wilsonian Doctrine in Trying to Make Peace.

PARIS, April 24.—As to the grave crisis which has arisen in the peace conference there are no two opinions in France today. There is agreement, however, that no stone must be thrown to find a solution of the existing deadlock.

The more conservative opinion as represented by such organs as the *Figaro* is inclined to deplore President Wilson's action in making his statement public, as likely to do more harm than good.

Its evident object, the *Figaro* says, is to transfer to the market place negotiations and discussions much better carried on in calm and privacy. What was only a difference might thus be transformed into a quarrel.

M. St. Riche in *Le Journal* says the incident was the result of the manifold mistakes made by all parties. The Italians, he thinks, submitted a gross blunder in publishing their claims in advance, thus eliminating all possibilities of maneuvering.

## Had Start Made.

"It was a bad start which weighed on the negotiations," he said, "and the discussion only accentuated the points of difference. The compromise plan left by President Wilson when he withdrew from the council of four on April 21 might have had some chance of success if it had been put forth by an independent arbitrator, but France and England could not very well endorse a proposal at variance with the treaty of London."

M. St. Riche declares that rupture was far from the intention of the Italians yesterday, that in the morning Salvatore Barilla, called upon Premier Clemenceau in behalf of the Italian delegation and submitted a fresh proposal for a compromise by which Italy would take the city of Fiume and the Jugo-Slavs the suburb of Suak, across the river Rčina.

Italy further agreed to renounce her claim to the Dalmatian coast, getting the islands only and receiving from the league of nations a mandate to administer the cities Zara and Zhenio.

The horizon was clearing, the writer declares, when President Wilson's statement came like a bombshell. Writing the *Echo de Paris*, "Paris" launches a diatribe against President Wilson.

## Sacrifice Too Much to Wilson.

"We already sacrificed too much to the Wilsonian doctrine, solemnly condemned by the American voters last November," he says. "The international regime we have accepted for the dear marks an act of weakness which will cost our country dear. Are we going still farther in our enthusiasm for the new order? Are we going to tear up all existing treaties? Is nothing to remain of our alliance?"

L'Oeuvre represents the opposite extreme among the commentators. "We did not discuss the fact that in such a moment we heard with genuine emotion the voice of President Wilson rise above the mutterings of these international confabulations," it says. "President Wilson, tired of the confidential wire pulling of secret diplomacy, has finally rent the veil and appealed to public opinion."
